DETAILED ACTION

1. This action is responsive to amendment filed 01/17/05.
2. Claims 1-21 are pending in the application.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Claims 1, 8 and 15 disclose a method for indicating available modifications to a geometric object, comprising: accepting from a user, placement of a user selected 3D geometric object in a computer drawing program; simultaneously displaying a first oriented 3D grip glyph directly on the 3D geometric object and a second oriented 3D grip glyph directly on the 3D geometric object, wherein the first oriented 3D grip glyph and second oriented 3D grip glyph provide a direct visual indications of valid movement directions, during direct manipulating 3D geometric object using the grip glyphs. The closest prior art Chen teaches selecting 3D object from the user and direct manipulation of the bounding box, not direct manipulation of the 3D object and Chen also does not teach simultaneously displaying a first oriented 3D grip glyph directly on the 3D geometric object and a second oriented 3D grip glyph directly on the 3D geometric object. Anderson also does not teach displaying of the 3D grid glyph directly on a 3D object that has been selected by the user and placed the user-selected 3D object in a computer drawing program. For these reasons, claims 1, 8 and 15 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
